

REPAIR MORTARS, GROUTS & CONCRETE

Application Use Guide

Citro Toro® Divo	CikeTon 444 Plus	SikaTan 122 Blue	and the same of th	CikaTan 122 Plua
 SikaTop® Plus Specialty repair mortars for demanding civil environments Two component, polymer modified, with a penetrating corrosion inhibitor Polymer modified for enhanced physical properties Sika FerroGard 901 penetrating corrosion inhibitor for embedded reinforcement Prepackaged unit 1 gal + 1 bag Potable water approved 	SikaTop 111 Plus - 2,500 psi, 1 day - 7,000 psi, 28 day - Form & pour applications - Screed mortar ½" to 1" neat as a mortar -1" to 6" when extended with aggregate as concrete	SikaTop 122 Plus - 3,000 psi, 1 day - 7,000 psi, 28 day - Trowel grade - ½" to 1" neat as a mortar - 1" to 4" when extended with aggregate as concrete		SikaTop 123 Plus - 3,500 psi, 1 day - 7,000 psi, 28 day - Vertical or overhead - 1/6" to 11/2" neat
SikaQuick [®]	SikaQuick 1000		SikaQuick 2500	
 Rapid hardening repair mortars Very low shrinkage Very low permeability Easy to mix / flowable or trowelable Conforms to ASTM C-928 	- 1,000 psi, 3 hours - 9,000 psi, 28 day (neat) - 5,500 psi, 28 day (extended) - ¼" to 1" (neat) - 1" to 6" when extended with aggregate as concrete - 6 hour epoxy recoat time		- 2,500 psi, 1 hour - 8,500 psi, 28 day (neat) - 5,500 psi, 28 day (extended) - 1/4" to 1" (neat) - 1" to 6" when extended with aggregate as concrete - 4 hour epoxy recoat time	
Sika MonoTop® One component Polymer modified Silica fume enhanced Very low permeability	Sika MonoTop 611 - Form and pour, neat and extended - Form and pump, neat and extended - 6,500 psi, 28 day - ½" to 1" neat -1" to 6" when extended with aggregate as concrete			Sika MonoTop 615 - Multi purpose mortar - Trowel applied - Spray applied (wet) - Non-sag - 4,300 psi, 28 day - ½" to 1 ½" neat
SikaRepair [®]	SikaRepair 222	SikaRepair 223	SikaRepair SHB	SikaRepair SHA
 One component, cementitious Add water or SikaLatex R for improved modified properties General purpose mortar repair Economical 	- Trowel grade - 5,000 psi, 28 day (water) - 5,500 psi, 28 day (Latex R) - ¼" to 1" neat (water) - ½" to 1" (Latex R) -1" to 6" when extended with aggregate as concrete	- Vertical or Overhead - 7,000 psi, 28 day (water) - 7,500 psi, 28 day (Latex R) - ¼" to 1½" lift (water) - ½" to 1½" lift (Latex R)	- Normal set - Superior high build Vertical or Overhead - 5,000 psi, 28 day (water & Latex R) - ¼" to 3" lift (water) - ½" to 3" lift (Latex R)	- Superior high build Vertical or Overhead - Accelerated set - 4,500 psi, 28 day (water) - 5,000 psi, 28 day (Latex R) - ¼" to 3" lift (water) - ½" to 3" lift (Latex R)
Sikacrete® • Prepackaged concrete mix. Extended with coarse aggregate • Fluid, pourable, pumpable • Full depth repairs • Non-accelerated	Sikacrete 211 - 5,000 psi, 28 day - Low shrinkage - Low permeability - 1" minimum, 8" maximum - Normal setting concrete			
SikaRepair® & SikaCem Machine Applied Mortar	Sikacem 133	Sikacem 103	SikaRepair 224	Sikacem 103F
Contains dust inhibitors	- Polymer modified - 8,000 psi, 28 day	- General purpose - Silica fume enhanced - 8,000 psi, 28 day	- Wet spray - 10, 000 psi, 28 day - Silica fome enhanced	- Fiber reinforced - Silica fume enhanced - 8,000 psi, 28 day
 Less rebound Silica fume enhanced Products for either wet/dry process 	- 1/4" to 2" minimum* (Large Areas) - 2" to 6" maximum* (Local Applications) *wet or dry * Thickness in one lift depending on size	- 1/2" to 2" minimum* (Large Areas) - 2" to 6" maximum* (Local Applications) * wet or dry * Thickness in one lift depending on size	- Fiber reinforced- Normal set times- Can be hand applied	- 1/4" to 2" minimum* (Large Areas) - 2" to 6" maximum* (Local Applications) * wet or dry * Thickness in one lift depending on size
Silica fume enhanced	- ¼" to 2" minimum* (Large Areas) - 2" to 6" maximum* (Local Applications) *wet or dry	- 1/4" to 2" minimum* (Large Areas) - 2" to 6" maximum* (Local Applications) * wet or dry	- Normal set times	- 2" to 6" maximum* (Local Applications) * wet or dry
